

## Woven Label

Written by KPGA - Cambodia

---

Nothing can enhance the perceived value and image of an article more than a woven label. Lasting the life of the garment, a woven label is a constant reminder to the customer of the core values of the brand quality and luxury.

Woven ribbons are used in a vast assortment of applications including ribbon wrapping flat folded shirts, handles for promotional bags and integration of trim into a textile or apparel item.

A wide variety of materials and weaves can be employed including Taffeta, Damask, Satin, twill, Polyester, Cotton, Metallic and Micro weave yarns. Finishing options include embossing, laser-cutting, woven edge, hot-cut, folding, looping, heat sealing, adhesive application and ultrasonic cutting.
